

WINDOW BOX BUYING GUIDE

Easy Curb Appeal
Solutions

By adding attractive window box planters you can grow edibles and create colorful window privacy too. Our easy-to-use Window Box Buying Guide will help you get started.

Increasing curb appeal to your home is more than adding an aesthetic element to make your home beautiful. By beautifying your home's exterior with decorations and cost-effective landscaping, you also increase property value, enhancing your neighborhood in the process. Yet other benefits can be significant. In the buying guide, you will learn a step-by-step selection process – from how to measure for planter boxes to what is the best, long-lasting material to choose, with additional curb appeal ideas suggested in the mix. It's just that easy!

Regular Window Sizes

Without Shutters

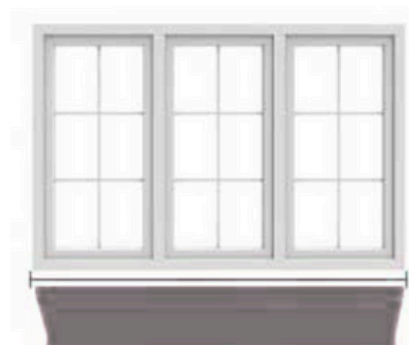

Measure your window from left to right, choose a size up to 8" longer.

Regular Window Sizes

With Shutters

Measure your window from left to right and measure the width of your shutters. Choose a window box that protrudes up to 1/3 of your shutters.

Multiple Windows

Without Shutters

Measure your windows from left to right including spaces between them. Choose sizes for individual windows or one long planter. This is a personal preference for each homeowner.
